

Modern Map of Israel and surrounding countries

Caesarea Maritima

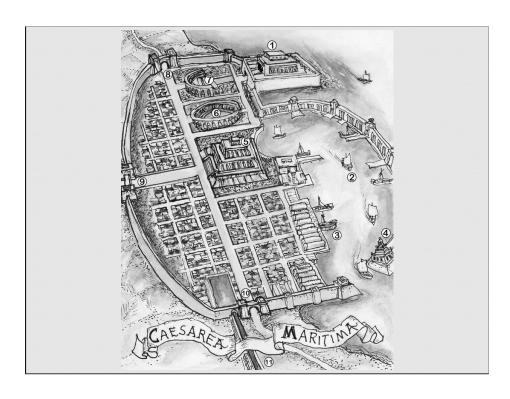

03_

- ™ "Maritima" means "by the sea"
- № Built by Herod the Great between approximately 22 and 10 B.C. and was named for Caesar Augustus.
- Rerod built this city to serve the needs of the Roman Empire, because it did not have a major harbor in Israel.
- A massive project → there is not a natural bay. They used huge blocks of sandstone assembled with lead to build the harbor.
- \mathbf{R} At its peak, Caesarea had a population of over 100,000 people.
- № The excavated ruins today cover the Roman, Byzantine, Muslim, and Crusader periods.

<u>_</u>C3_

- № The ruins at Caesarea are very important because they show us what a Roman city looked like at that time.

- Caesarea was full of sculptures, as was typical of Roman cities of the time (All of them are headless as they were beheaded by Muslims because Islam does not allow icons).

Artist drawing of Caesarea which shows the Hippodamian Plan

03_

- © First mentioned when Philip came to Caesarea as he went from city to city, spreading the gospel after the conversion of the Ethiopian eunuch (Acts 8:40).
- After Paul's conversion, Paul was brought to Caesarea and sent on a ship to Tarsus to avoid death by those who were opposed to his testimony (Acts 9:30).
- Caesarea was the home of Cornelius, and was mentioned in Acts 10:1, 24 and 11:1 related to his conversion.

03

- Soon after Peter escaped from prison, Herod Agrippa I
 journeyed to Caesarea where he made his final speech
 "upon the throne" (Acts 12:19−23). Acts records that he sat
 down and praised himself as one with the voice of a god
 (Acts 12:22). An angel of the Lord struck him down (with
 worms) because he did not give God the glory (Acts 12:23).
- Caesarea, he greeted the church (Acts 18:22).
- During his third missionary journey, Paul visits Philip the evangelist, who had a house in Caesarea (Acts 21:8).

03

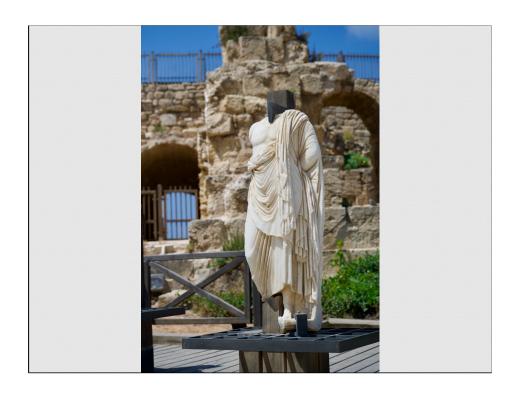

- ca The last mention of Caesarea comes in chapters 23 through 26, in which Paul appears before Felix, Festus, and Agrippa II (Acts 23:33–26:32). When Paul arrives in Caesarea, he is kept in "Herod's praetorium." (Acts 23:35).
- Real The palace at Caesarea was likely used by Pontius Pilate while he was a Roman Governor before moving to Jerusalem. An inscription mentioning him was found in Caesarea, and there is a replica of this inscription on the palace site today.
- ™ The synagogue at Caesarea was also where the Jewish revolt against the Romans began in 67 A.D.

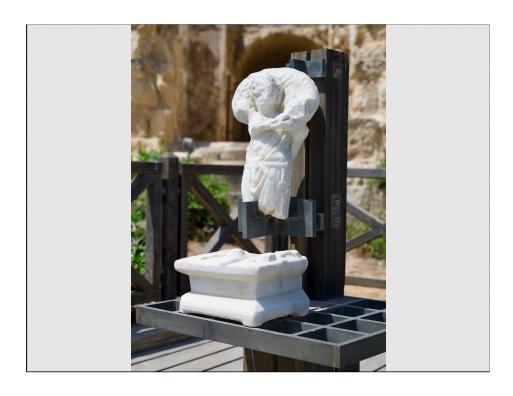

In the remains of lower palace, right on the Mediterranean \rightarrow "By the Sea"

Caesarea was built right on the sea

Example of one of the sculptures found in Caesarea that are now located right outside the theater. All of them are headless as they were beheaded because Islam does not allow icons.

Sculpture of a boy with a sheep over his shoulder from the Byzantine period (4^{th} to 6^{th} century AD)

Theater of Caesarea, which is a half-circle (Full circle would be an amphitheater). The base of this theater is original sandstone, but the seats have all been restored with concrete to allow for modern-day concerts. It is frustrating that so much restoration is taking place at these sites. They were working on the theater when I first came to Caesarea, and they are still working on it.

Talking to our group in the theater at Caesarea

Today the site contains many recovered column fragments and other items such as a a sarcophagus. The marble and granite used in the construction of Caesarea (columns, statues, etc.) were brought in from outside of Israel.

View of the Lower palace (Praetorium) from Herodian times. This area included gardens, mosaics, a swimming pool, and the nearby hippodrome (this was built later). All of this was built right on the Mediterranean, and the views are stunning. It was specifically mentioned in Acts 23:35 that Paul was being held in Herod's palace.

Ancient mosaics and the remains of a swimming pool (bath) at the lower palace.

Inscription found at Caesarea - "Pontius Pilate, the prefect of of Judea, erected a building dedicated to the emperor Tiberius."

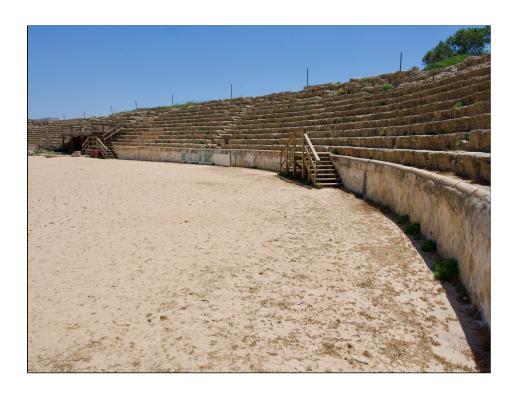

The palace at Caesarea was likely used by Pontius Pilate while he was a Roman Governor before moving to Jerusalem. An inscription mentioning him was found in Caesarea, and there is a replica of this inscription on the palace site today (the original is in the Israel Museum).

Column fragments from the lower palace

View of the upper palace toward the hippodrome

Remains of a Hippodrome beside the palace. Hippodrome literally means "circle of horses" and was a full amphitheater for chariot races. The Mediterranean side of the hippodrome is no longer there as it was consumed by the sea. Most of the buildings in Caesarea were structures of amusement.

To the north there are the remains of the ancient aqueduct at Caesarea. Aqueduct literally means "water carrier" in Latin. It was important for cities to have a source of fresh water, and this aqueduct was built by Herod the Great to carry water approximately 8 miles from a spring on Mt. Carmel. This fresh water would have been used for daily consumption, ritual washings by the Jews, and fountains for the Romans. They have found three pipes on top of this structure made from ceramic. They have also found inscriptions at the aqueduct from unit 10 of the Roman Army. It is believed that this is the same unit that destroyed Jerusalem, and the assumption is that Herod had soldiers doing construction and maintenance work when they were not in battle.

Jezreel Valley

03

- ™This valley is south of Galilee and north of the hill country of Ephraim.
- © Deborah and Barak defeated the Canaanites in the Jezreel Valley (Judges 4–5).
- [™]Gideon fought and defeated the Midianites on a hill in this valley with just 300 men (Judges 6–7).
- Saul camped at the spring of Jezreel before his final battle with the Philistines and his death on Mount Gilboa (1 Samuel 31).

Tel Megiddo

03

- ™ Megiddo is a fortress city that dates back to about 5,000 B.C., located on the southwest side of the Jezreel Valley at the foot of Mount Carmel.
- Megiddo was a city that was located on the Via Maris, an ancient trade route linking Egypt with the northern empires of Syria, Anatolia, and Mesopotamia. Megiddo's location on this route showed that the city was very significant.

Tel Megiddo (Cont.)

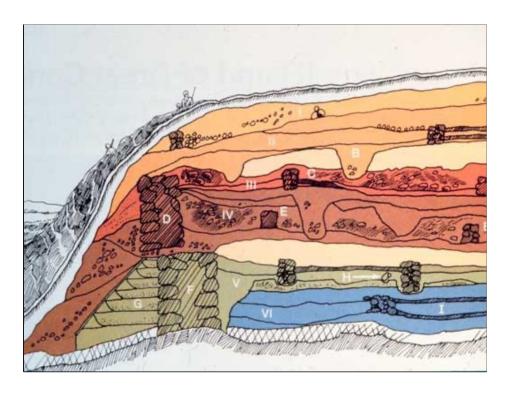

03

- ™ Megiddo is referenced 12 times in the Old Testament.
- ™ Megiddo is mentioned among the cities conquered by Joshua (Josh 12:21), though apparently they were unsuccessful at fully driving out the Canaanites (Josh 17:11).
- ☼During the reign of Solomon, Megiddo was fortified along with Gezer and Hazor (1 Kgs 9:15).
- ™ The city fell to Shishak (925 BC) and to Tiglath-pileser III in 733 BC.
- Josiah died at Megiddo in 609 BC in his confrontation with Pharaoh Neco (2 Kgs 23:29).

Tel Megiddo (Cont.)

03

- ™ Megiddo was destroyed 30 times by waves of conquerors, and this has resulted in 30 levels or strata that comprise the Tel.
- - Most likely this association is metaphor

Representative diagram of a Tel (Tell) showing levels of strata from years of destruction and rebuilding.

Tel Megiddo (June 2022)

Ancient staircase from the Canaanite (before 15^{th} century BC) period before the children of Israel took the promised land.

Main gate of Megiddo from the 16th century B.C. (This means that it is 3500 years old). This was the only way in and out of city.

The gate had multiple rooms on either side of it. This was for the collection of taxes from those who entered the city. Wooden planks show line of what is original to the site, and what has been reconstructed.

Pathway to the top of Tel Megiddo

Gate from 10^{th} century B.C. (Israelite period > time of Solomon). Partially destroyed getting to the lower gate from the 16^{th} century (December 2019)

Same Israelite gate two and one half years later (June 2022)

View from the top of Tel Megiddo showing excavation through the various strata. Note the round Canaanite altar to the right. (June 2022)

Remains of the Northern Palace and northern stables. This palace was from either the $10^{\rm th}$ (Solomon) or $9^{\rm th}$ (Ahab) centuries BC.

Speaking to our group from the top of Tel Megiddo / Overlooking the Jezreel Valley

Grain Silo from 8th century BC / time of Jeroboam II (8th century B.C.)

Remains of the Southern Stables from the 9th Century B.C. (Time of Ahab)

Remains of the Southern Stables from the 9th Century B.C. (Time of Ahab)

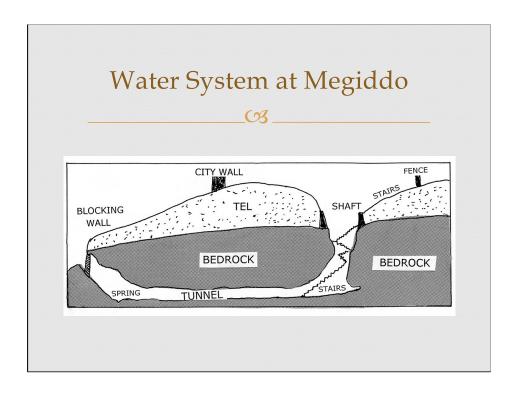

Diagram of the Megiddo Water System from the 9th Century BC (Time of Ahab). The water system was a tunnel that was built underground to the spring which was the source of water for the city. This was key for being able to access the water supply during times of siege. The spring was covered from the outside so that it was only accessible via the tunnel.

Entrance of the Megiddo Water System from the 9th Century BC (Time of Ahab). The water system was a tunnel that was built underground to the spring which was the source of water for the city. This was key for being able to access the water supply during times of siege. The spring was covered from the outside so that it was only accessible via the tunnel. Notice the original steps to the right of the modern steps.

Tunnel leading down to the Megiddo Water System from the 9th Century BC (Time of Ahab). The water system was a tunnel that was built underground to the spring which was the source of water for the city. This was key for being able to access the water supply during times of siege. The spring was covered from the outside so that it was only accessible via the tunnel.
